

In re Patent Application of  
COLEMAN ET AL.  
Serial No. 10/761,014  
Filed: JANUARY 20, 2004

---

REMARKS

Applicants appreciate the Examiner's careful and thorough examination of the present application, and the indication of allowable subject matter. By this amendment, the specification and the claims have been amended to eliminate minor informalities contained therein. Specifically, the specification has been amended to include the application serial numbers of the related applications, and the claims have been amended to recite a "wideband swept frequency signal" instead of a -relatively wideband swept frequency signal- because the term "wideband" already refers to a wide band of frequencies. Such claim amendments do not narrow the claim scope for any reason related to patentability. Claims 1-19 remain pending in the application.

In view of the amendments and foregoing remarks, it is respectfully submitted that the present application is in condition for allowance. If there are any remaining informalities which need to be resolved before the application can be passed to issue, the Examiner is respectfully requested to contact the undersigned by telephone to resolve such informalities.

Respectfully submitted,

PAUL J. DITMYER
